Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This action is a responsive to applicants' amendment filed February 4, 2005. After reconsideration, the indicated allowability of claims 1-9 has been withdrawn. US Patent 5,927,277 to Baudino of record is believed to encompass the scope of at least claim 1. The examiner regrets the delay this action may have caused.

The examiner attempted a courtesy call on May 5, 2005, 3:15 pm, EST, to Attorney Brian Gold, but no contact was made.

Claims 1-27 are pending in this application; claims 10-27 are withdrawn from consideration. A complete response to a final Office Action must include a cancellation of the non-elected claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Baudino (US Patent 5,927,277). The patent to Baudino et al discloses each of the limitations recited in the claims as follow: See the rejection and like reference part below

Art Unit: 3731

Claims 1-3, 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Baudino (US Patent 6,044,304). The patent to Baudino et al discloses each of the limitations recited in the claims as follow:

- a burr hole plug ring (100) insertable into a burr hole so as to be flush with the patient's skull. The flange (10) lie flush to the patient's skull; further figure 12, suggest placing an element of the plug assembly flush with the plug.
- a sealing member (60) that seals an opening through the center of the ring;
- wherein the burr hole plug slightly larger the burr hole thereby creating a compressive force. See column 3, lines 21-26 and Figure 12, where the teeth are compressed against the wall of the burr hole.

Concerning claim 1, the term *flush* has been interpreted in its broadest meaning of directly abutting or immediately adjacent.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 3731

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 4-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baudino '277 in view of Baudino et al '304. Each of the references discloses a variety of biocompatible material used to make the inventions compressible and non-compressible. It would have been obvious to one having ordinary skill in the art to make the segments from a number of non-compressible and compressible materials to strengthen certain segments like the flange; and the insert segment from compressible material so as to compress to fit a smaller burr hole.
